Press release
March 2023

"Better solutions for wood coating": sustainable liquid coating solutions at LIGNA 2023

From May 15 - 19, 2023, J. Wagner GmbH will present innovative liquid coating solutions for craftsmen's workshops, furniture and flooring manufacturers, paint producers and other companies in the woodworking industry. These solutions not only serve a wide range of applications from manual to automatic, but also contribute to more sustainable coating with their economical use of materials.

At the booth, visitors will be able to experience manual airspray and AirCoat guns, such as the **TOPFINISH GM 1030**, which produces an extremely precise spray pattern with little overspray – there are versions with paint connection or flow cup for small-area applications. The guns are also available as part of **predefined spraypacks**: an ideal combination together with the right feeding technology. The **Cobra 40-10**, for example, is unique on the market as a high-pressure double diaphragm pump: it is very powerful and, thanks to its particularly small internal volume, requires significantly less solvent during flushing than comparable piston pumps. The **2K Smart** will be exhibited as mixing and dosing system.

On the other hand, solutions for **highly efficient, automated coating processes** will also be presented. For exemplary practical demonstration, various automatic guns will be mounted alternately on a cobot - a collaborative robot that is also suitable for users without many years of robot experience. The **GA 1030** and **GA 4000AC** automatic guns offer a high degree of flexibility with their different mounting options.

In addition, WAGNER will also be showing products from the bonding and marking sector of its subsidiary WALTHER Spritz- & Lackiersysteme GmbH: Among others, airspray guns for adhesive application, such as the **PILOT GM 1030P ADH** or the automatic **PILOT GA 9010 Marking** for edge-to-edge dot and line marking.

You will find us in hall 17, booth B47!

About WAGNER:

J. Wagner GmbH is part of the WAGNER Group, one of the world's leading manufacturers of equipment and systems for surface coating with powder and liquid lacquers, paints and other liquid materials. The WAGNER Group portfolio also includes bonding, sealing and encapsulation technology including injection moulding with the brands WAGNER, Titan, HomeRight, WALTHER PILOT, Reinhardt-Technik and CA Technologies. The beginnings of the company go back to the year 1947. Today the innovative coating technologies of WAGNER are used in industry as well as by craftsmen and do-it-yourselfers and set standards in the industry. The WAGNER Group is represented worldwide by around 2,000 employees in 16 operative companies and around 400 agencies. Owners of the WAGNER Group are the Josef Wagner Foundations, which pursue exclusively charitable goals.
