

Sustainable liquid coating solutions for wood

Dear Mrs. Villnow,

"Better solutions for wood coating": Experience us at the **LIGNA in Hanover from May 15 - 19**. We will be presenting **innovative liquid coating solutions** for craftsmen's workshops, furniture and flooring manufacturers, paint producers and other companies in the woodworking industry. These solutions not only serve a wide range of applications from manual to automatic, but also contribute to more sustainable coating with their economical use of materials.

POWDER COATING

New generation of automatic guns

The new automatic guns **PEA-X1** and robot guns **PER-X1** offer several advantages over the previous model - including an optimized nozzle system for even more uniform coating thicknesses and lower powder consumption. Due to the large selection of nozzles and accessories, the guns can be adapted to the most varied coating requirements.

PEA-X1

Automatic powder guns

POWDER COATING

How to coat non-metallic workpieces successfully

The Danish contract coater Brandt is able to successfully coat **non-conductive, temperature-sensitive substrates (e.g. wood or plastic)** with the M-Line powder coating system. The result is resistant surfaces, significant powder savings and an improved environmental balance.
